Md Abdur Razzak

MERN Stack Developer

Email: mdabdurrazzakrakib290@gmail.com | **Address:** Dhaka, Bangladesh | **Phone:** +880 1609502136

Github | **Portfolio** | **Linkedin**

Objective

As a MERN Stack Developer, I focus on building high-quality web applications using MongoDB, Express, React, and Node.js. I'm passionate about coding and continuously learning to improve my skills. I aim to create effective, user-friendly websites and applications that make a lasting impact on projects while delivering a great user experience.

Experience

Bdcalling It - Jr Full Stack Developer *January 2025 To Present*

Core Expertise: React.js, JavaScript, Tailwind CSS, Git, REST APIs, React Router DOM, Chrome Dev Tools **Proficient**

In: Redux, Next.js,MongoDB, Express.js, Firebase, TypeScript and Mongoose, Zod validation.

Familiar: NodeJS, JWT.

Soft Skills: Strong problem-solving, effective communication, teamwork, adaptability, time management, attention to detail, and a commitment to quality.

Projects

Car wash booking system **Live Site** | **Github(Client)** | **Github(Server)**

A Platform for users to book car wash services, manage appointments, and make secure payments. Includes role-based dashboards for users and admins.

- **Real-Time Booking & Secure Transactions:** Dynamic scheduling with real-time updates, slot availability, and secure payment integration to ensure a smooth booking experience.
- **User Engagement:** Supports CRUD operations for services, allows user feedback and reviews, and includes secure user authentication and validation using zod

Technologies: React.js, Typescript, Redux Toolkit, Ant Design, JWT, AAMARPAY, Tailwind CSS, Vercel

Turitors (Educational website) **Live Site** | **Github(Client)** | **Github(Server)**

Built an assignment management platform for creating, updating, deleting, and viewing assignments, with evaluator feedback. Implemented localStorage for token management, added a banner and FAQ section, and ensured a responsive design.

- **Assignment Management Platform:** Developed a platform for users to manage assignments, with evaluators grading and providing feedback, ensuring clear navigation and security.
- **Responsive Design:** Integrated Firebase and used Tailwind CSS for a sleek, responsive user interface.

Technologies: React.js, MongoDB, Express.js, Node.js, JWT, Firebase, Tailwindcss, react helmet, daisy Ui

Lakeview cottage **Live Site** | **Github(Client)** | **Github(Server)**

Developed a platform with three roles where users manage profiles and view announcements, admins control coupons and announcements, and members handle payments, ensuring seamless communication for all.

- **Multi-Role Website:** Built a website with three roles: Users manage profiles, Admins handle coupons, and Members manage payments.
- **Secure and Flexible:** Added safe login, rental tools, and easy admin controls with a responsive design. ● **Efficient Filtering:** Enabled smooth parallel filtering for better user experience.

Technologies: React.js, MongoDB, Express.js, Node.js, JWT, Firebase, Tailwindcss, React Hook Form, tanStack query (data Fetching).
